PROFESSIONAL SUMMARY

IT Manager with 5+ years of experience managing QuickBooks Point of Sale systems, IT infrastructure, and technical operations. Skilled in troubleshooting, system optimization, and maintaining business-critical applications. Additionally experienced in Android development, backend systems, and full-stack web technologies, with a focus on building scalable, user-centered solutions.

TECHNICAL SKILLS

Programming Languages:
Java, Python, JavaScript

Frameworks & Libraries:
React, Flask, Django, Spring Boot, Node.js

Mobile Development:
Android (Java, SQLite, Sensors API)

Tools & Platforms:
Git, GitHub, Vercel, Android Studio, VS Code

CORE COMPETENCIES

- Android Application Development.

- REST API Development.
- Database Design (SQLite).
- Full-Stack Web Development.
- System Design & Problem Solving.
- Version Control (Git & GitHub).

EXPERIENCE

IT Manager

Winner Distributors | Embu, Kenya

2020 – Present

- Led management and maintenance of QuickBooks POS system to ensure accurate transaction processing and inventory tracking.
- Provided technical support and troubleshooting for POS issues, reducing system downtime and improving transaction efficiency.
- Administered system updates, backups, and data integrity checks to prevent data loss and ensure business continuity.
- Oversaw IT infrastructure including hardware, networking, and system performance optimization.
- Trained staff on effective use of QuickBooks POS and related systems, improving productivity and reducing user errors.
- Implemented basic security practices to safeguard financial and customer data.
- Generated sales and inventory reports using QuickBooks POS to support business decision-making.
- Maintained system uptime and ensured reliable transaction processing in a fast-paced retail environment.

PROJECTS

SmartVision – Android Application

- Developed an Android mobile application using Java and Sensors API to detect eye strain in real-time, improving user awareness through automated notifications.
- Designed and implemented a rule-based decision engine for strain classification.
- Integrated SQLite database for storing and analyzing sensor data.
- Built real-time notification system for user alerts and recommendations.
- Optimized application performance within Android background execution limits.

Technologies Used: Java, Android SDK, SQLite.

Portfolio Website

- Developed a responsive portfolio using Next.js and Tailwind CSS.
- Designed a clean, user-friendly interface to showcase projects and skills.
- Implemented mobile-first responsive design for cross-device compatibility.
- Deployed using GitHub and Vercel CI/CD pipeline.

Technologies Used: Next.js, Tailwind CSS, Vercel
Live: https://my-portfolio-gamma-teal-35.vercel.app/

Urban Swap – Car Hire System

- Designed and implemented database schema for users, vehicles, and bookings.
- Developed booking workflows and user interaction features.
- Structured system to support scalability and multiple user roles.
- Applied backend logic for transaction and system flow management.

Technologies Used: Flask, HTML, CSS, JavaScript.

ADDITIONAL EXPERIENCE

Software Development Experience (Academic & Personal Projects)

- Developed Android and web applications using modern frameworks.
- Implemented backend logic and database integration.
- Used Git and GitHub for version control and collaboration.
- Applied software engineering principles including modular and scalable design.
- Built real-world solutions focused on usability and performance.

EDUCATION

Bachelor of Science in Computer Science
University of Embu, Kenya.

Relevant Coursework: Software Engineering, Mobile Application Development, Database Systems, Machine Learning

ADDITIONAL SKILLS

- Strong analytical and problem-solving skills.
- Fast learner and adaptable to new technologies.
- Excellent communication skills.
- Fluent in English and Swahili.
