Portfolio: <https://my-portfolio-gamma-teal-35.vercel.app/>

LinkedIn: <https://www.linkedin.com/in/job-munyoki-8b4456303>

PROFESSIONAL SUMMARY

Computer Science graduate with experience in software development, cybersecurity-focused systems, data analytics, machine learning, Android applications, web development, and IT support. Skilled in Java, Python, JavaScript, Django REST Framework, React, Next.js, Streamlit, Pandas, Scikit-learn, MySQL, SQLite, and Supabase. Developed projects including CyberShield, Smart Agrovets Sales Analytics Dashboard, Agrovets Sales Prediction Model, SmartVision, and Urban Swap Lite. Experienced in QuickBooks POS administration, technical troubleshooting, networking, and business systems support.

TECHNICAL SKILLS

Programming Languages:

Java, Python and JavaScript.

Frameworks & Libraries:

React, Next.js, Django, Django REST Framework, Flask, Spring Boot, Node.js, Material UI and Tailwind CSS.

Data Analytics & ML:

Pandas, NumPy, Scikit-learn, Streamlit, Plotly, CSV Analytics and Predictive Modeling.

Databases:

MySQL, SQLite and Supabase/ PostgreSQL.

Mobile Development:

Android (Java, SQLite and Sensors API).

Tools & Platforms:

Git, GitHub, Vercel, Railway, Android Studio, VS Code, QuickBooks POS and Streamlit Community Cloud.

CORE COMPETENCIES

- Full-stack web development.
- REST API development and integration.

- Cybersecurity incident and vulnerability management systems.
- Database design and data management.
- Data analytics and business intelligence dashboards.
- Machine learning and predictive analytics.
- Sales forecasting, KPI tracking, and CSV data processing.
- Android application development.
- System design and problem solving.
- Version control with Git and GitHub.
- IT support, troubleshooting, and system administration.
- QuickBooks POS administration.
- Networking fundamentals, data backup, and recovery.

EXPERIENCE

IT Manager, Accounts and Debt Collection

Winner Distributors | Embu, Kenya | 2020 - 2026

- Led management and maintenance of QuickBooks POS system to ensure accurate transaction processing and inventory tracking.
- Provided technical support and troubleshooting for POS issues, reducing system downtime and improving transaction efficiency.
- Administered system updates, backups, and data integrity checks to prevent data loss and ensure business continuity.
- Oversaw IT infrastructure including hardware, networking, and system performance optimization.
- Trained staff on effective use of QuickBooks POS and related systems, improving productivity and reducing user errors.
- Implemented basic security practices to safeguard financial and customer data.
- Generated sales and inventory reports using QuickBooks POS to support business decision-making.
- Managed customer debt follow-ups and maintained accurate debtor, payment, sales, and financial records.
- Prepared supporting documentation and submitted records to the auditor for KRA return filing.
- Assisted with eTIMS receipts, stock records, and general administrative duties.

PROJECTS

CyberShield - Cybersecurity Incident & Vulnerability Management System

- Built a full-stack cybersecurity incident and vulnerability management system for tracking organizational security operations.
- Implemented asset management, incident reporting, vulnerability tracking, critical alert monitoring, investigation timelines, and audit logs.
- Designed role-based workflows for Admin, Security Analyst, and Staff users to support secure access control.

- Developed REST API functionality and connected the React frontend to backend services for real-time system management.
- Deployed the frontend on Vercel and backend/admin system on Railway for live demonstration.

Technologies Used: Django REST Framework, React, Material UI, MySQL, Railway, Vercel, GitHub

Live Demo: <https://cybershield-three-pi.vercel.app>

GitHub: <https://github.com/JobMunyoki/cybershield>

Smart Agrovet Sales Analytics Dashboard - Business Intelligence Dashboard

- Developed a Python and Streamlit business intelligence dashboard for agrovet sales analysis, product demand, revenue trends, and inventory movement.
- Implemented CSV upload, data cleaning, KPI tracking, category filtering, and interactive visualizations for sales performance monitoring.
- Used Pandas and Plotly to transform sales data into actionable insights for business decision-making.

Technologies Used: Python, Pandas, Streamlit, Plotly, CSV Analytics, Business Intelligence

Live Demo: <https://smart-agrovet-sales-dashboard-adm6s4hshkgz2ejtpehewx.streamlit.app>

GitHub: <https://github.com/JobMunyoki/smart-agrovet-sales-dashboard>

Agrovet Sales Prediction Model - Machine Learning Application

- Built a machine learning application that predicts future agrovet sales using historical sales data.
- Trained and evaluated a predictive model to support demand forecasting, stock planning, and business decision-making.
- Developed an interactive Streamlit interface for users to enter sales-related inputs and view predicted results.

Technologies Used: Python, Scikit-learn, Pandas, NumPy, Streamlit, Machine Learning, Sales Forecasting

Live Demo: <https://jobmunyoki-agrovet-sales-prediction-model-app-j7b7sn.streamlit.app>

GitHub: <https://github.com/JobMunyoki/agrovet-sales-prediction-model>

SmartVision - Android Application

- Developed an Android mobile application using Java and Sensors API to detect eye strain in real time and improve user awareness through automated notifications.
- Designed and implemented a rule-based decision engine for strain classification.
- Integrated SQLite database for storing and analyzing sensor data.
- Built real-time notification system for user alerts and recommendations.
- Optimized application performance within Android background execution limits.

Technologies Used: Java, Android SDK, SQLite

Portfolio Website

- Developed a responsive portfolio using Next.js and Tailwind CSS.
- Designed a clean, user-friendly interface to showcase projects and skills.

- Implemented mobile-first responsive design for cross-device compatibility.
- Deployed using GitHub and Vercel CI/CD pipeline.

Technologies Used: Next.js, Tailwind CSS, Vercel

Live: <https://my-portfolio-gamma-teal-35.vercel.app/>

Urban Swap Lite - Vehicle Rental Platform

- Built a full-stack vehicle rental platform using Next.js, Supabase, and Tailwind CSS.
- Implemented vehicle listing, booking management, and administrator approval workflows.
- Integrated Supabase database and authentication services.
- Designed a responsive user interface for desktop and mobile devices.
- Deployed the application using Vercel with GitHub-based CI/CD workflows.

Technologies Used: Next.js, Supabase, Tailwind CSS, Vercel, GitHub

Live Demo: <https://urban-swap-lite-4frfdunj-jobmunyokis-projects.vercel.app>

ADDITIONAL EXPERIENCE

Software Development Experience (Academic & Personal Projects)

- Developed Android and web applications using modern frameworks.
- Implemented backend logic and database integration.
- Used Git and GitHub for version control and collaboration.
- Applied software engineering principles including modular and scalable design.
- Built real-world solutions focused on usability and performance.

EDUCATION

Bachelor of Science in Computer Science

University of Embu, Kenya.

Relevant Coursework: Software Engineering, Mobile Application Development, Database Systems, Machine Learning, Computer Network Security.

Bachelor of Arts in Development Studies with IT

Maseno University, Kenya.

Relevant Coursework: Project Planning and Management, Monitoring and Evaluation, Research Methods, Community Development, Development Economics, Governance and Public Administration, Sustainable Development, Management Information Systems, Web Design and Development.

ADDITIONAL SKILLS

- Strong analytical and problem-solving skills.
- Fast learner and adaptable to new technologies.
- Excellent communication skills.
- Fluent in English and Swahili.

REFEREES

Available upon request.
